

# 318

→ SERVICE EXCELLENCE → AFFORDABILITY → EXCEPTIONAL VALUE

THIS COMBINATION : SUGAR MAPLE AND STORM GREY

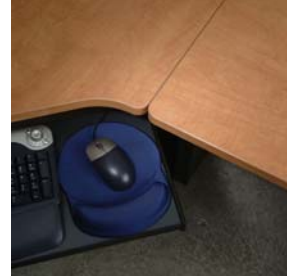

Heartwood's 318 Series provides all of the flexibility and modularity of our popular 388 Series, but adds the softness of radiused corners (see inset over). With hundreds of standard workstation and desking components available, numerous finishes and the durability of 3 mil PVC on all exposed edges, the 318 Series offers contemporary style with a soft touch.

## QUALITY

# 318

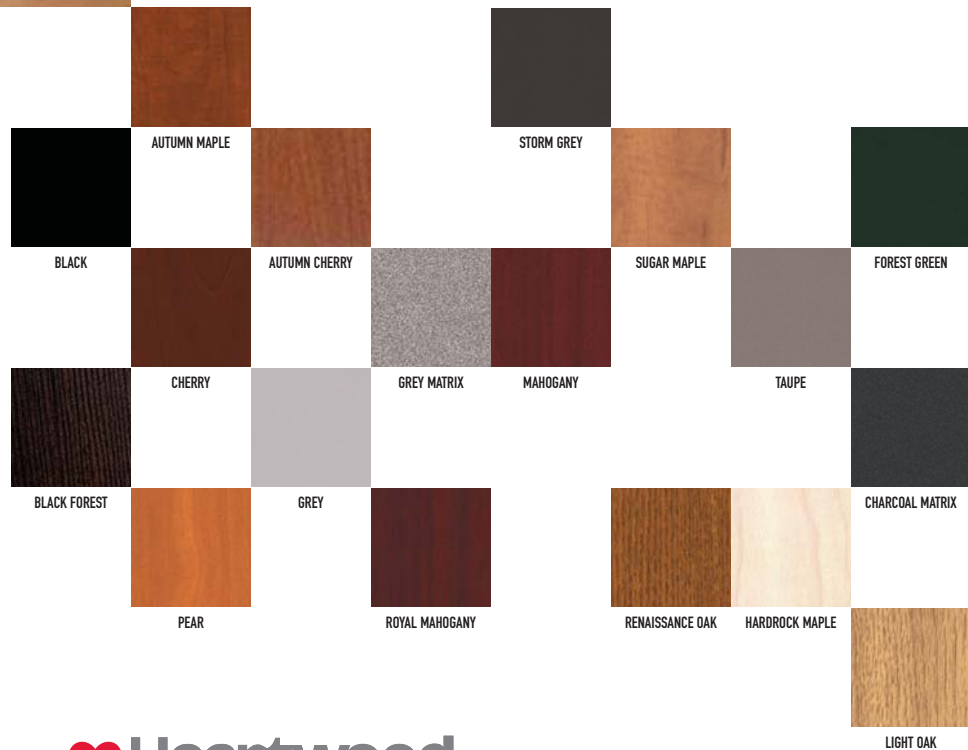

→ HUNDREDS OF COMPONENTS → NUMEROUS FINISHES → PRACTICAL SOLUTIONS

The 318 Series is especially popular in educational and medical administration offices, but works well in virtually any fast-paced or high traffic office environment. Top and Gable components are all 1" thick, thermally fused laminate with a tough 3 mil PVC matching edge, to resist impact damage. The radiused corner detail not only softens the "look" but adds a practical flair by eliminating sharp, 90 degree corners. With Heartwood's excellent reputation for customizing standard components, you'll not only have furniture that will look great for years, we'll help you create a practical solution that fits your work area perfectly. Now, that's Heartwood!

Ergonomic radiused corner detail throughout series.
